Programme

Import (for your information only)
In this section we will cover the various import options such as the import with or without data transfer and synchronous vs. asynchronous.

Desktop client install and import
For these 2 workflows, see

Analysis

This part constitutes the core of the training and we will explore the different means OME provides to interact with image and non-image data and how to best integrate these into your workflows.

Analysis with Fiji

- Analysis with Fiji: Java
  - Fiji client side: manual Analysis via UI
  - Fiji client side: scripting: Groovy and Macro
  - Fiji: Analysis in the cloud: Java and Macro

For setup of the Fiji plugin see

For the walkthrough in this workshop, see the four Fiji chapters
https://omero-guides.readthedocs.io/en/latest/fiji/docs/threshold_scripting.html and

Analysis with Ilastik

- Analysis with ilastik: Python
  - Manual Analysis via UI
Analysis in the cloud: Python
See for both setup and workflows

Server side analysis

- Analysis server side
  - How to write a Python script
  - How to upload the script to the server

Server-side scripts (python)
For further information about how to write and manage server-side scripts see

Analysis with CellProfiler (for your information only)

- Analysis with CellProfiler: Python
  - Analysis in the cloud: Python and using CellProfiler API
See for all CellProfiler workflows
Note that https://mybinder.org/ will be used for CellProfiler setup as described in
https://github.com/ome/omero-guide-cellprofiler

Analysis in QuPath (for your information only)
