Import

In this section we will cover the various import options such as the import with or without data transfer and synchronous vs. asynchronous.

Desktop client install and import

For these 2 workflows shown in the workshop, see

<https://omero-guides.readthedocs.io/en/latest/upload/docs/import-desktop-client.html> and

<https://omero-guides.readthedocs.io/en/latest/upload/docs/import-desktop-client.html#import-for-another-user>

Command line import, bulk import, in-place import

These import sections not covered in the workshop can be found at

Analysis

This part constitutes the core of the training and we will explore the different means OME provides to interact with image and non-image data and how to best integrate these into your workflows.

Analysis with Fiji

- Analysis with Fiji: Java

- Fiji client side: manual Analysis via UI
- Fiji client side: scripting: Groovy and Macro
- Fiji: Analysis in the cloud: Java and Macro

For setup of the Fiji plugin see

Analysis with CellPose, StarDist, CellProfiler setup - analysis environments

For the basic setup for Cellpose, StarDist and CellProfiler OMERO bindings, either

- (easier, environment will be set up on the cloud) Click on the Google Colab badge in https://github.com/ome/EMBL-EBI-imaging-course-05-2023/blob/main/Day_4/setup.md
- or
- (more rewarding, local setup) Follow the instructions in https://github.com/ome/EMBL-EBI-imaging-course-05-2023/blob/main/Day_4/setup.md
