Human Developmental Biology Initiative OMERO Workshop

Summary

Import into OMERO (1)
- Manual import OMERO.insight
OMERO core concepts
- Data management - Metadata
OMERO figure
- How to use figure

Analysis with 3rd party tools
- Analysis with Fiji: manual
Import into OMERO (2)
- Bulk import using command line
- IDR submission criteria and import strategies

Content

Import

In this section we will cover the various import options such as the import with or without data transfer and synchronous vs. asynchronous.

Desktop client install and import

Command line import, bulk import, in-place import

These import sections not covered in the workshop can be found at https://omero-guides.readthedocs.io/en/latest/upload/docs/import.html
OMERO core concepts

Data management and cooperation

Viewing images (OMERO.iviewer)

Annotate data and filter using annotations

Search

Viewing images (3D viewer: OMERO.FPBioimage)

Export

OMERO parade

Data mining using OMERO.parade on Projects and Plates

OMERO figure

Fast creation of publication figures using OMERO.figure
See https://omero-guides.readthedocs.io/en/latest/figure/docs/omero_figure.html

Analysis
This part constitutes the core of the training and we will explore the different means OME provides to interact with image and non-image data and how to best integrate these into your workflows.

Analysis with Fiji

- Analysis with Fiji: Java
For setup of the Fiji plugin see
For the walkthrough in this workshop, see Fiji chapters

**Analysis with CellPose, StarDist, CellProfiler setup - analysis environments**

For the basic setup for Cellpose, StarDist and CellProfiler OMERO bindings, either
- (easier, environment will be set up on the cloud) Click on the Google Colab badge in
  or
- (more rewarding, local setup) Follow the instructions in

- Analysis with CellProfiler - further reading:

**Analysis in R**

See for R analysis

**Server side analysis**

- Analysis server side
  - How to write
  - How to upload the script to the server

**Server-side scripts (python)**

For further information about how to write and manage server-side scripts see

-----------------------------
Optional analysis (for you information only)
See for Python scripts (for your information only)
See for Java scripts (for your information only)
