

OMERO.figure embraces OME-Zarr

OME 2026

Will Moore, Petr Walczysko

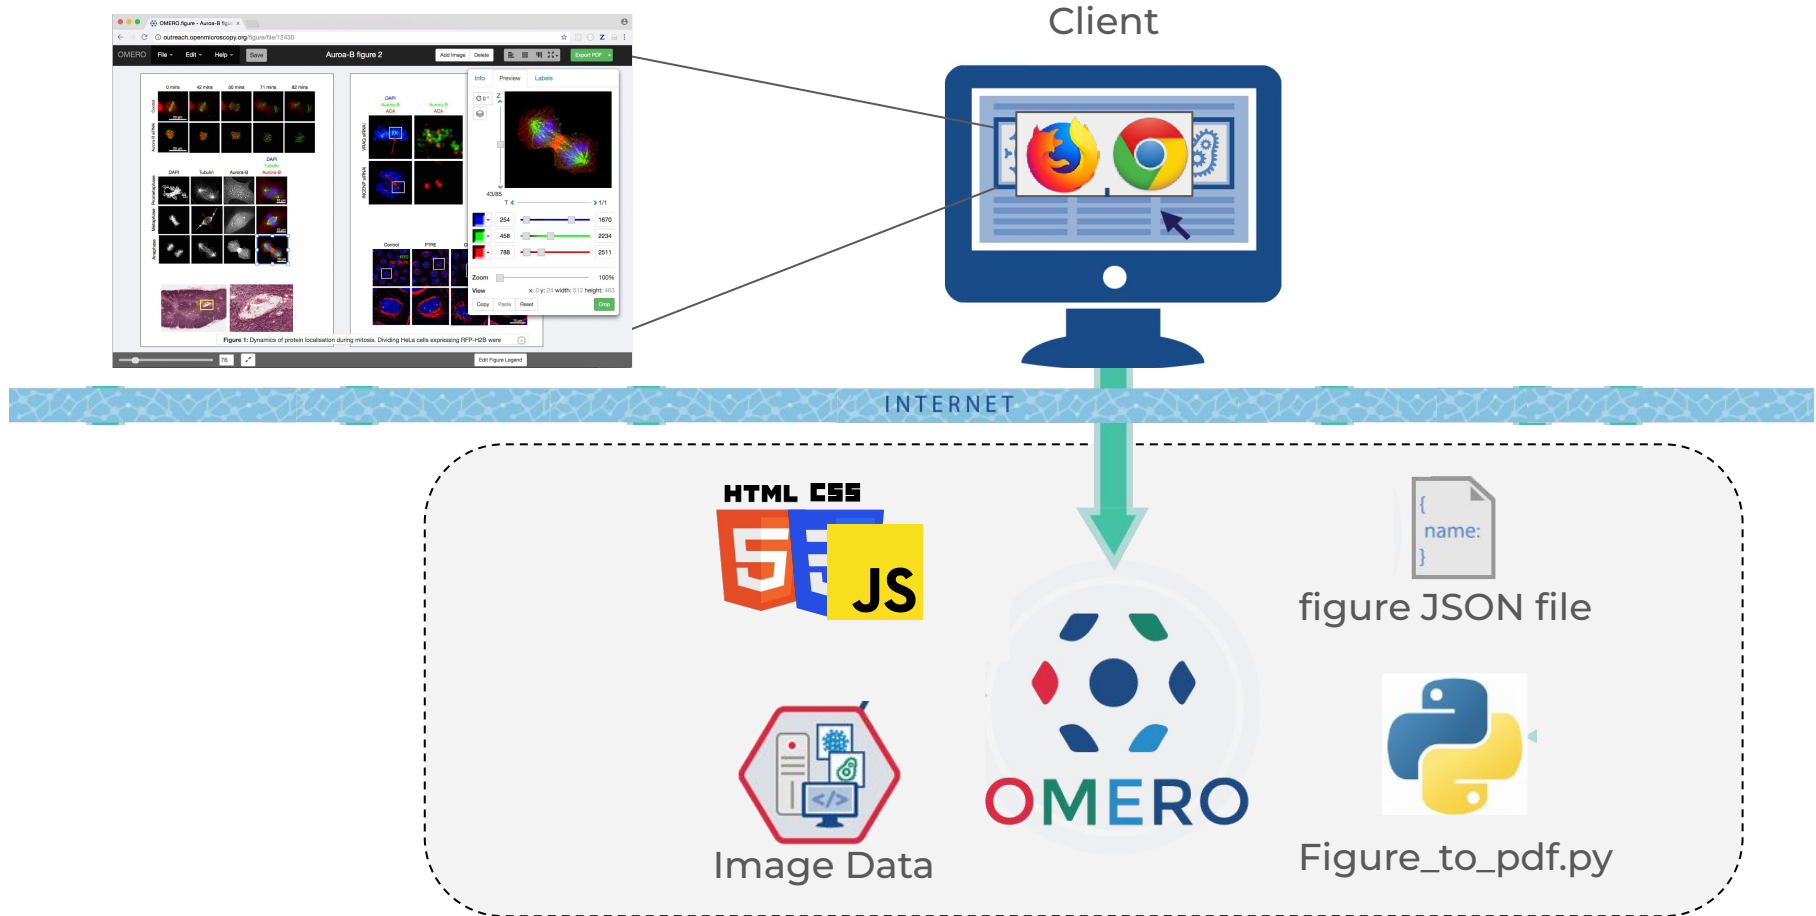

OMERO.figure embraces OME-Zarr

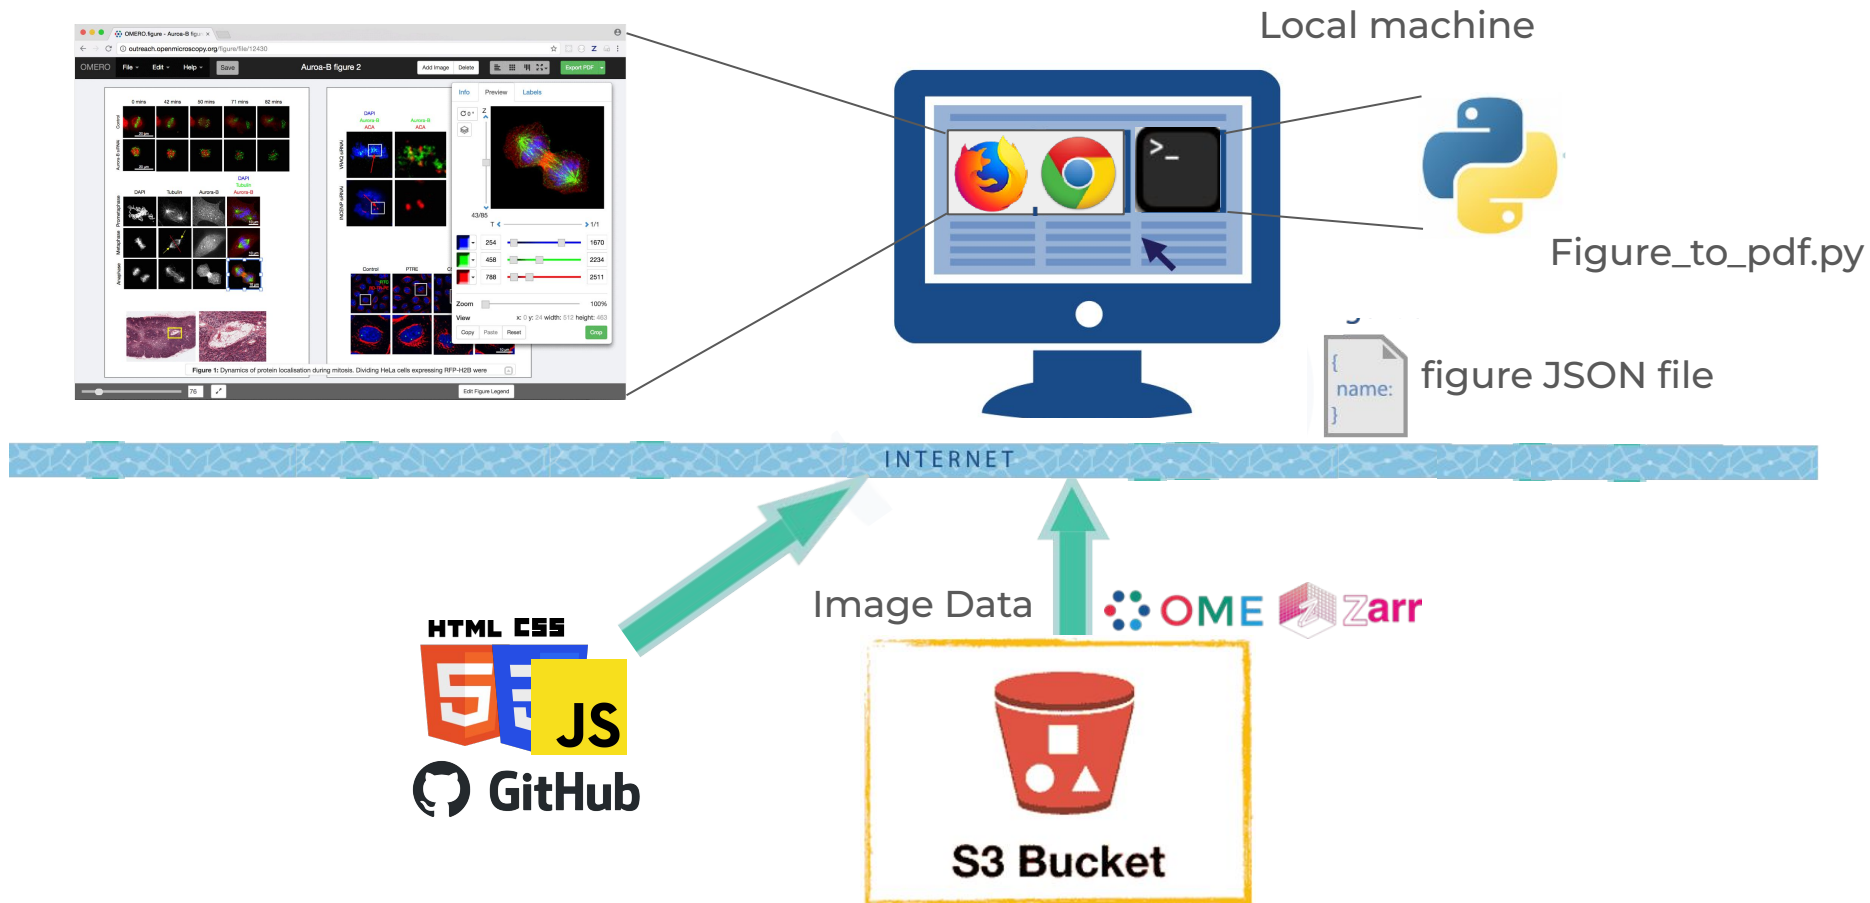

Key points:

- No change for OMERO users
- This work is not “released” yet (release candidate)

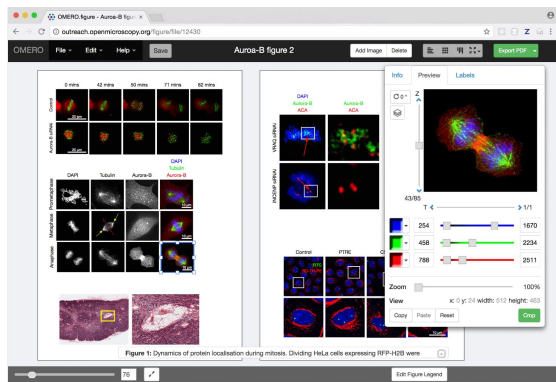

OMERO.figure as it is now

(OMERO).figure standalone

(OMERO).figure standalone + local image data

Figure_to_pdf.py

figure JSON file

OME Zarr Image Data

Demo...

- Go to <https://ome.github.io/omero-figure/>
- ***Open File > Open*** (to load demo file)
- Sample images at <https://ngff.openmicroscopy.org/>

Discuss: Should we rename **omero**-figure to **ome**-figure?

- Pros / Motivation:
 - “OMERO” naming is off-putting to non-OMERO users?
 - Usage in OMERO would be unchanged: Open with > Figure
- Cons:
 - Renaming things takes time
 - User confusion?
